Curriculum Vitae

Sakiko Obuchi

Waseda University
Department of Physics,
Faculty of Science and Engineering
3-4-1 Okubo, Shinjuku-ku, Tokyo, 169-8555, Japan

Website: https://sakikoobuchi.github.io/
Email: buchi-13526.cjl@fuji.waseda.jp
Phone:+81-3-5286-8069

Education

M.S. in Physics, Waseda University, Japan (advisor: Kohei Ichikawa) Apr.2025–
B.S. in Physics, Waseda University, Japan Mar.2025

Research Interests

- Active galactic nuclei (AGN) – their unification, environment, and the structure
- Supermassive Black Holes – growth and evolution
- Co-evolution of supermassive black holes and their host galaxies
- Searching extremely variable sources using multi-wavelength data

Certifications

First-class teaching certificate for junior/senior high school in Japan (Science) Mar.2025

Publication List

* indicates corresponding author.

[1] *"Discovery of an X-ray Luminous Radio-Loud Quasar at $z = 3.4$: A Possible Transitional Super-Eddington Phase"*
Obuchi, S.,*, Ichikawa, K.*, Yamada, S.,, et al., 2026, ApJ, 997, 2, 156

Press Releases

[1] *"Theory-Breaking Extremely Fast-Growing Black Hole"*
Joint press release by NAOJ, Subaru Telescope, Waseda U., and Tohoku U. Jan.2026

Observing experience

Subaru (co-I): S25A-040 (MOIRCS, 0.5n, PI: Kohei Ichikawa)

Conference Talks

[5] *"Discovery of an X-ray Luminous Radio-Loud Quasar at $z = 3.4$: A Possible Transitional Super-Eddington Phase"*
SMBH growth viewed with large field surveys: special focus on the initial results from Subaru PFS, ASIAA, Taiwan Mar.2026

[4] *"Discovery of an X-ray Luminous Radio-Loud Quasar at $z = 3.4$: A Possible Transitional Super-Eddington Phase"*
ALMA Workshop 2025, Ishikawa, Japan Nov.2025

[3] *"MOIRCS confirmation of super-Eddington accretion in an extremely X-ray loud radio quasar at $z = 3.4$ in the eROSITA/eFEDS field"*
Subaru Users Meeting, NAOJ, Japan Oct.2025

[2] *"eROSITA Detected Radio Quasar Possibly Reaching Super-Eddington Accretion Limit"*
Galaxy-IGM Worpshop 2025, Tochigi, Japan Jul.2025

[1] *"eROSITA Detected Radio Quasar Possibly Reaching Super-Eddington Accretion Limit"*
ASJ Autumn Annual Meeting 2024, Kwansei Gakuin University, Japan Sep.2024

Poster Presentations

[2] *"eROSITA Detected Super-Eddington Radio Quasar With A Soft X-ray Excess"*
ASJ Spring Annual Meeting 2025, Yamaguchi, Japan Sep.2025

[1] *"eROSITA Detected Radio Quasar at* $z = 3.4$ *Reaching Super-Eddington Accretion Limit"*
Galaxy Evolution Workshop, Nagoya University, Japan Aug.2025
